NEWS LETTER

2016-17

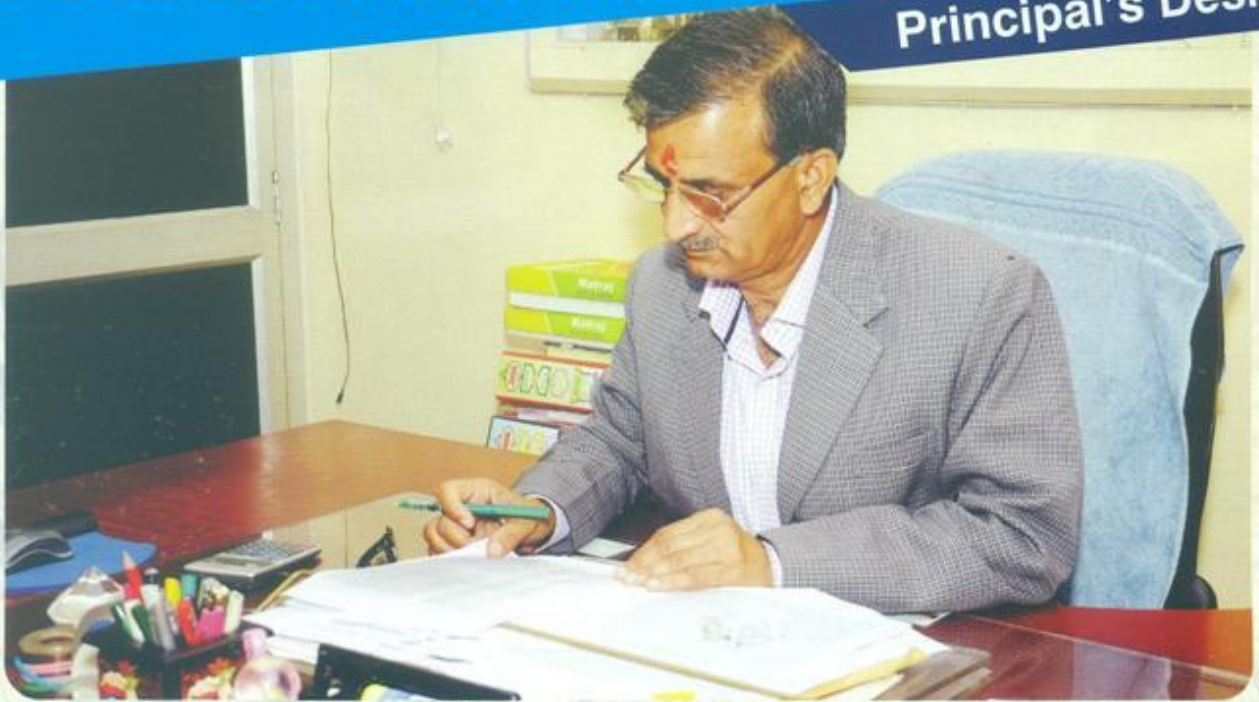

KOMAL (XI D)

A Document of Academic and Cultural Nuances

From the

Principal's Desk

The whole purpose of education is to make the children think scrupulously and act wisely. This is the fundamental truth and it has always been the endeavour of the school to instill right values in our students with productive thinking.

In this regard, we ensure that in our school the students are taught to develop skills to become active, creative, independent and the persons with great knowledge for future perspectives.

Our school children learn through exploration and experimentation with co-curricular activities. They are given opportunity for optimum exposure, thereby acquire confidence, creativity and consciousness.

In this world where cut throat competition has become a part and parcel of the life, it is our responsibility to teach our students to be competent enough to stand as light house amongst others with their extra ordinary skills and be victorious in the realms of this challenging labyrinth. To achieve this height we have developed an atmosphere where each child receives love, dignity and acceptance. Here, we are also blending thoroughly the modern and traditional approaches which are conducive for learners and make them action oriented as in the words of Dr. APJ Abdul Kalam Dream! Dream! Dream!, Think! Think! Think and put that thought into Action! Action! Action! This thought of Dr. Kalam acts as our motto and always inspires our teachers as well as students to follow the path shown by such torch bearers.

Hobby Camp

For honing the skills of the children, a summer camp was organized in the school premises in the month of June. Many children from all the wings of the school participated in various activities such as Dance, Communicative Skills, Art & Craft classes etc. In addition, the students were taught values and manners to enable them to be sincere citizens. The

students enjoyed the classes and practised a lot thereby learning different scholastic and co-scholastic skills. The management as well as parents of children supported and appreciated the efforts of the teachers.

Cooking Without Fire & Salad Decoration

The visitors couldn't believe their eyes when they looked at the white birds and red cats carved out of radish and apples respectively. Many other fruit and vegetables were cut stylistically by the children and decorated in such a way that left a permanent imprint on the mind of the visitors. Even the beverages and a variety of bread crumbs including chocolate flavour fascinated the guests. Every year a competition of Salad Decoration and Cooking without Fire is organized in the Junior Wing of the school. This year also about 180 students from all the houses participated in this competition and won fabulous prizes.

Congratulations!!!

The meaning of 'school education' is changing rapidly in the present scenario. The much used phrase 'all round development' seems coming true now. Gone are the days when only syllabus in the books was covered within a limited time period. Nowadays even the govt. emphasizes a schedule of co-curricular activities to be organized throughout the year with the syllabus. Even the parents are much aware of the activity based syllabus. Most of them want their child on the stage, singing, reciting poems, dancing in a group, doing some acting etc. with their superb academic record. This way a child

grooms to be smart, active and multi-talented which is the need of the hour.

We at TIT Sr. Sec. School polish the children for converting them into talented citizens inculcating in them values, manners, behavioural aspects, courtesy etc. with their better performance every time in academics. Our staff moulds them in such a way that they may fit themselves everywhere with the skills attained in our school. We always look forward for their better future.
