News Letter

The future belongs to those who believe in the beauty of their dreams.

"The seeds of knowledge may be planted in solitude but must be cultivated in the public."

In an era, where everyday turns out as the witness of comprehensive achievement in one field or the other, we believe to impart ample knowledge to our students so that they may prove themselves as torchbearers for the upcoming generation. The need of the hour is to root students firmly in constructive framework for their meaningful blooming. To meet this need, our school has set up appropriate edifice of learning equipped with latest educational technology which will hone students' skills and harness unbound talents of young learners. Appreciable results every year symbolize that our school has been doing exceptionally well and shaping the 'Nation Builders' of tomorrow in its best possible way. The installation of ATL (Atal Tinkering Laboratory) is one such major step in this direction to materialize the students' dream to go for innovation and amaze the world. Our school pivotally aims at all round grooming of the children that consists of academic, social, cultural, ethical and spiritual development. The school will continue its efforts undeterred till the ultimate destination is reached.

To conclude, I quote the words of Nelson Mandela, "Education is the most powerful weapon which you can use to change the world".
